CD-ROM for Windows

To install: Insert the CD-ROM into your CD-ROM drive. The CD-ROM will start automatically. If it does not, double-click on MY COMPUTER; find and open your CD-ROM disk drive, then double-click on the install.exe icon. The CD-ROM includes audio instructions to guide you in using this program effectively.

CD-ROM for Mac

To install: Insert the CD-ROM into your CD-ROM drive. A window will open with the contents of the CD. Drag the program icon to your Applications folder. For easy access, create an alias of the program on your desktop or your dock.

Minimum System Requirements:

Computer: Windows 2000, XP, Vista / Mac OS X 10.3.9, 10.4.x, 10.5.x

Pentium II, AMD K6-2, or better / Power PC (G3 recommended) or better; any Intel processor

256 MB RAM

14" color monitor 8× or better CD-ROM

Sound card

Installation: Necessary free hard-drive space: 300 MB

Settings: 800 × 600 screen resolution

256 (8-bit) colors (minimum)

Thousands (24- or 32-bit) of colors (preferred)

Call 800-722-4726 if the CD-ROM is missing from this book.

Irregular Verb Form Index 616

The Most Common Phrasal Particles 17

Index showing the base form of all irregular verb forms in the book

Preface

The Big Book of English Verbs provides more information on the most important verbs in the English language than any other book ever written. It contains basic conjugations and comprehensive usage patterns for 152 irregular verbs (all the irregular verbs that you will probably encounter), plus 403 of the most commonly used regular verbs: 555 verbs in all, with more than 14,000 example sentences.

No other book provides these unique features:

A complete listing of the complements for each verb

Verb complements are grammatical structures that verbs use to make correct, meaningful sentences. English has 18 basic complements, plus dozens of combinations of these. For instance, the verb *help*, when it means "assist, support," may use two complements together: an object and an infinitive. The infinitive, however, must be in its base form, that is, used without the *to* that normally accompanies an infinitive.

OBJECT + BASE-FORM INFINITIVE We helped the staff answer the phones.

Most English learners, even advanced ones, make the mistake of using *to* with the infinitive, because that is the more common complement. *The Big Book of English Verbs* is the only book that provides the correct complement in a useful format.

A listing of the important phrasal verb constructions for each verb

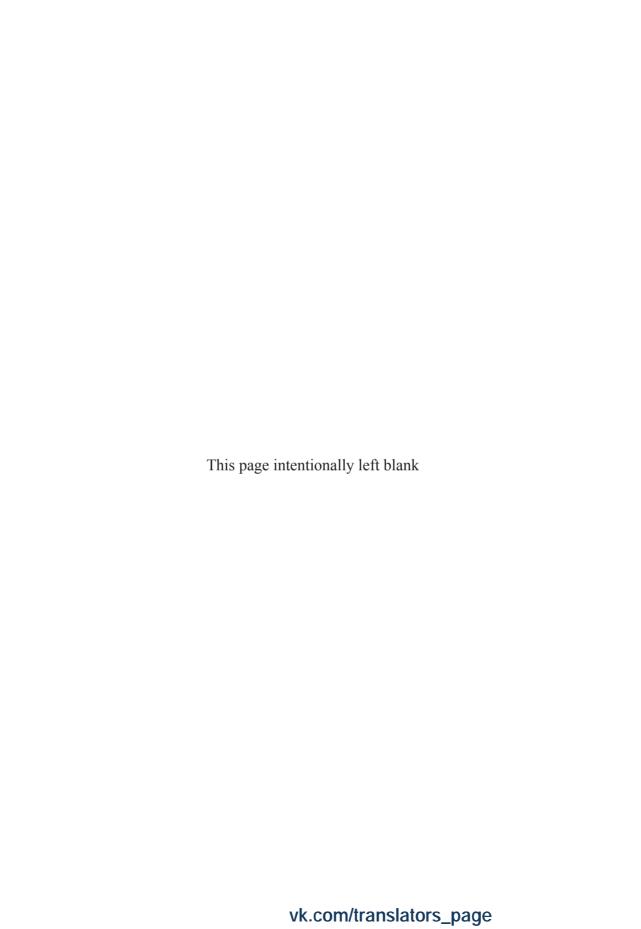

Phrasal verbs are idiomatic combinations of verbs plus adverbs or prepositions. For example, the phrasal verb *go off* can mean "to explode," even though nothing in the meaning of *go* or *off* would lead you to expect this meaning.

Moreover, there are important grammatical differences between phrasal verbs that consist of a verb + an adverb (separable phrasal verbs) and those that consist of a verb + a preposition (inseparable phrasal verbs). If the second element in a phrasal verb is an adverb, the adverb can (and in some cases MUST) be placed after the object. If the second element is a preposition, however, it can NEVER be moved away from the verb. *The Big Book of English Verbs* not only gives the meaning of every phrasal verb, but also indicates which combinations are separable and which are inseparable.

We've also included a CD-ROM, which contains self-assessment tests on verb tenses, verb complements, and phrasal verbs, as well as five sets of exercises featuring verb use issues that are difficult for English learners.

We are pleased to provide the keys that unlock the English verb system for English learners worldwide.

Mark Lester Daniel Franklin Terry Yokota

The English Verb

VERB FORMS AND TENSE USAGE

The Six Basic Verb Forms

Six basic verb forms are used to create the entire tense system of English: base form, present, past, infinitive, present participle, and past participle. These forms are illustrated in the following chart by the regular verb *walk* and the irregular verb *fly*.

BASE FORM	walk	fly
PRESENT	walk walks	fly flies
PAST	walked	flew
INFINITIVE	to walk	to fly
PRESENT PARTICIPLE	walking	flying
PAST PARTICIPLE	walked	flown

See "Guide to Conjugations" on page 10.

Base Form

The base form of a verb is its form in a dictionary entry. For example, if you looked up *sang*, the dictionary would refer you to the base form *sing*.

The base form is also the source (or base) for the present (with a few exceptions), infinitive, and present participle of the verb, whether the verb is regular or irregular.

The base form is used as a verb in three ways.

(1) It follows certain helping verbs, the most important being the **modal auxiliary verbs**, or **modals** for short: *can/could*, *may/might*, *will/would*, *shall/should*, and *must*. (Modal verbs themselves have no base form, infinitive, present participle, or past participle; they have only present and past forms.) Note the base form of the verb *be* in the following sentences.

```
I may be a little late.
He will be in New York all week.
You must be more careful.
```

Other verbs followed by the base form of a verb include *dare* (with *not*), *need* (with *not*), and *help*.

We need not **be** silent on the issue.

(2) The base form is used in imperatives (commands).

```
Be good!
Come here, please.
Oh, stop it!
```

(3) Less commonly, the base form is used as a complement of certain verbs.

```
OBJECT + BASE-FORM INFINITIVE We made them be quiet.

My parents helped me be a success.
```

A base-form infinitive is an infinitive minus the *to*. If an infinitive including the word *to* were substituted for the base-form infinitive in the first example above, the resulting sentence would be ungrammatical.

X We made them to be quiet.

Present

With the sole exception of the verb *be*, the present form of all verbs is derived directly from the base form. The main difference between the present and base forms is that the third-person singular present form adds -s or -es to the base form of the verb; all other present forms are identical to the base form.

The base form of *be* is different from all of its present tense forms.

	SINGULAR	PLURAL
FIRST PERSON	I am	we are
SECOND PERSON	you are	you are
THIRD PERSON	he/she/it is	they are

Both the pronunciation and the spelling of the third-person singular present ending are predictable. If the base form ends in a sibilant sound (s, z, x, sh, ch, tch, or j (as in judge)), the ending is pronounced as a separate syllable rhyming with buzz. The ending is spelled -es, unless the base form already ends in -e, in which case only -s is added.

BASE FORM	THIRD-PERSON SINGULAR PRESENT FORM
cross	crosses
place	places
buzz	buzzes
fix	fixes
wish	wish es
attach	attach es
budge	budges

If the base form ends in a voiceless consonant sound other than a sibilant, the ending is pronounced /s/ and is spelled -es. (The voiceless consonants are usually spelled with a p, t, ck, k, f, or gh (when pronounced /f/).

help	helps
collect	collects
back	back s
park	park s
scoff	scoffs
laugh	laughs

If the base form ends in a voiced consonant other than a sibilant or in a pronounced vowel (as opposed to a silent final -e), the ending is pronounced /z/ and is spelled -s.

absorb	absorbs
forbid	forbids
dig	digs
love	loves
swim	swim s
join	join s
feel	feels
pay	pays
agree	agrees
cry	cries
owe	owes
argue	argues

Note that if the base form ends in -*y* without a preceding vowel, the -*y* changes to -*ie* before the -*s* ending (see *cry* above).

A few verbs have irregular third-person singular present forms.

be is have has

Two verbs have irregular pronunciations in the third-person singular present form.

do does (rhymes with buzz) say says (rhymes with fez)

Past

There are two types of past forms: regular and irregular.

Regular verbs form the past tense by adding -ed to the base form (or simply -d if the base form already ends in -e).

BASE FORM	REGULAR PAST FORM
open	open ed
need	need ed
move	move d
place	place d

The regular past ending has three different, but completely predictable, pronunciations. If the base form ends in a /t/ or /d/ sound, the -ed is pronounced as a separate syllable rhyming with bud.

PAST FORM PRONOUNCED

BASE FORM AS A SEPARATE SYLLABLE

adopt adopted

vote voted

decide decided

depend depended

If the base form ends in a voiceless consonant sound other than /t/, the -ed is pronounced /t/. The final voiceless consonants are usually spelled with a p, ck, k, s, sh, ch, tch, x, f, or gh (when pronounced /f/).

```
PAST FORM PRONOUNCED AS /t/
BASE FORM
tap
              tapped
attack
              attacked
miss
              missed
              wished
wish
              matched
match
              mixed
mix
              coughed
cough
```

Note that if the base form ends in a single consonant preceded by a stressed short vowel, the consonant is usually doubled to form the past: permit ~ permitted, stop ~ stopped.

If the base form ends in a pronounced vowel or in a voiced consonant sound other than $\frac{1}{2}$, the $\frac{1}{2}$ is pronounced $\frac{1}{2}$. The voiced consonants are usually spelled with a b, b, b, b, b, b, b, or b.

BASE FORM PAST FORM PRONOUNCED AS /d/
tie tied
enjoy enjoyed
judge judged
kill killed
care cared

Note that if the base form ends in -y without a preceding vowel, the -y changes to -ie before the -d ending ($cry \sim cried$). Also note the spellings of the past forms of lay and pay: laid and paid, respectively.

The past forms of irregular verbs reflect older patterns of forming the past tense. These patterns have merged to such an extent that it is not practical to learn the past forms of irregular verbs on the basis of their historical patterns. Similarities exist, however, in how some irregular verbs form the past tense.

VOWEL CHANGE	ring	rang	sing	sang		
vowel change $+$ - \mathbf{d}	sell	sold	tell	told		
NO CHANGE	bet	bet	put	put	rid	rid

Following are the past forms of the ten most common verbs in English, all irregular.

BASE FORM	PAST FORM
be	was were
have	had
do	did
say	said (rhymes with fed)
make	made
go	went
take	took
come	came
see	saw
know	knew

Infinitive

The infinitive of a verb consists of to + its base form. There are no exceptions—even the verb be is regular: to be.

BASE FORM	INFINITIVE
walk	to walk
fly	to fly
be	to be
do	to do

Infinitives are used as complements of certain verbs.

I would like **to meet** your friend.

They invited us to stay for dinner.

Present Participle

The present participle is formed by adding -ing to the base form.

BASE FORM	PRESENT PARTICIPLE
walk	walk ing
fly	fly ing
be	being
do	doing

Note that if a verb ends in a single consonant preceded by a stressed short vowel, the consonant is usually doubled: *bet* ~ *betting*, *dig* ~ *digging*, *drop* ~ *dropping*, *refer* ~ *referring*, *rid* ~ *ridding*. If a verb ends in silent -*e*, the -*e* is dropped before the -*ing* ending: *observe* ~ *observing*, *rule* ~ *ruling*, *write* ~ *writing*.

The present participle is used in two ways. By far the more common is after a form of the verb *be* in the progressive tenses.

The kids were **walking** to the beach. I am **flying** to Chicago tomorrow.

Less common is the present participle's use as a complement of certain verbs.

I hate **doing** the dishes every night. I saw Holly **talking** to Christopher.

Past Participle

There are two types of past participles: regular and irregular.

Regular past participles are formed in exactly the same way as the regular past, that is, by adding *-ed* to the base form. To distinguish the two forms, remember that the past form can occur by itself, but the past participle almost always occurs after a form of *be* or *have*.

Like irregular past forms, irregular past participle forms are unpredictable. There is one generalization, however, we can make about them. In older periods of English, most irregular past participles ended in -en. Today, about one third of irregular past participles still retain this -en ending. Thus, if an irregular verb form has an -en (or -n) ending, we know it is a past participle.

choose chosen eat eaten fly flown see seen speak spoken	BASE FORM	PAST PARTICIPLE
fly flow n see seen	choose	chosen
see seen	eat	eat en
	fly	flow n
speak spok en	see	seen
	speak	spok en

Past participles are used in three ways in English.

(1) They are used in the perfect tenses after the helping verb *have*.

They have **flown** in from Pittsburgh for the wedding.

We had walked over to meet some friends.

He will have raised \$200.

(2) Past participles are used in passive sentences after the helping verb be.

Motorists are being **stopped** at the border. Her play was **seen** by thousands of people.

(3) Much less common is the past participle's use as a complement of certain verbs.

We need the car taken to the garage for an oil change.

Tense Formation and Usage

The term **tense** can have several different meanings, but we use **tense** to refer to any of the nine different verb constructions that result when the three logical time divisions (present, past, and future) are integrated with the three aspect categories of verbs (simple, perfect, and progressive—*simple* here means that it is not perfect or progressive). These nine tenses are illustrated in the following chart, with first-person singular forms of *walk* and *fly*.

	SIMPLE	PERFECT	PROGRESSIVE
PRESENT	I walk	I have walked	I am walking
	I fly	I have flown	I am flying
PAST	I walked	I had walked	I was walking
	I flew	I had flown	I was flying
FUTURE	I will walk	I will have walked	I will be walking
	I will fly	I will have flown	I will be flying

The Three Simple Tenses

PRESENT TENSE

The most confusing feature of the present tense for English learners is that the simple present tense does not actually signify present time. Its three main uses are the following:

- (1) making factual statements and generalizations, (2) describing habitual actions, and
- (3) describing predictable future events or actions.
- (1) The simple present tense is used to state objective facts that are not restricted by time.

A mile is 5,280 feet.

The Mississippi River **drains** the center of the North American continent.

Similarly, the simple present tense is used to state facts that are true for the foreseeable future.

We live on Elm Street.

This sentence means, "We have not always lived on Elm Street, and at some point in the future, we may move. Nevertheless, it is our current intention to remain living on Elm Street indefinitely." Contrast this sentence with the following one, which uses the present progressive tense.

We are living on Elm Street.

This sentence means, "We are only living on Elm Street temporarily, and we expect to move eventually."

The simple present tense is also used to make generalizations that are considered valid for the foreseeable future.

I hate spinach.

Smoking causes cancer.

(2) The simple present tense is used to describe habitual actions.

Bob **checks** his e-mail first thing in the morning.

This sentence describes what Bob normally does first thing in the morning. It does not mean that Bob is checking his e-mail now, at this very moment. The sentence would still be valid if Bob were on vacation and hadn't checked his e-mail in a week.

(3) The simple present tense is often used for near-future events or actions that one expects to happen.

Our flight leaves at nine.

I return home on Sunday.

Note that the simple present tense is not used for uncertain future events. For example, it is not used to describe future weather.

X It rains tomorrow.

PAST TENSE

The simple past tense describes an event or action that was completed before the present moment in time; that is, the event or action has already taken place. The past tense can refer to a single point in past time.

We **moved** into our house on September 5, 1980.

The past tense can also refer to a span of time in the past, as long as it was completed before the present.

Janet worked in sales for nearly ten years.

This sentence means that Janet is no longer working in sales at this time.

In addition, the simple past tense has inherited one of the functions of the subjunctive from older periods of English: indicating that the speaker is talking hypothetically or even contrary to fact. This hypothetical use of the past tense does NOT indicate past time. Its most common use is in IF-CLAUSES.

If I were you, I would be sure that I was finished on time.

The use of *were* rather than the expected *was* survives from an old subjunctive form. Notice also that the other two verbs in the sentence are in the past tense, even though the sentence does not refer to past time.

FUTURE TENSE

The simple future tense consists of the helping verb will followed by the base form of the main verb.

I will take a taxi to the airport.

They will be disappointed if you don't see them.

The helping verb *will* is one of the nine modal auxiliary verbs: *can/could, may/might, will/* would, shall/should, and must. Although will is used to form the future tense, any of the other eight modals can refer to future time.

I can take a cab to the airport. I **could take** a cab to the airport. I **may take** a cab to the airport. I **must take** a cab to the airport.

Each of the nine modals has its own range of meanings, allowing English speakers to make a number of subtly different statements about the possibility, certainty, desirability, or necessity of a future action.

The Three Perfect Tenses

The three perfect tenses consist of a form of the helping verb have followed by the past participle of the main verb. The present tense form of have is used for the present perfect, the past tense form for the past perfect, and the future tense form for the future perfect.

PRESENT PERFECT TENSE

The present perfect tense consists of *have* or *has* followed by the past participle of the main verb. This tense is used to describe an action that began in the past and has continued up to the present time, with the implication that it will continue into the future. The best way to understand the present perfect tense is to compare it to the past tense.

John **lived** in Los Angeles for five years. PAST TENSE John has lived in Los Angeles for five years. PRESENT PERFECT TENSE

According to the past tense sentence, John no longer lives in Los Angeles; he has moved. According to the present perfect tense sentence, John still lives in Los Angeles and is expected to continue living there into the foreseeable future.

PAST PERFECT TENSE

The past perfect tense consists of *had* followed by the past participle of the main verb. The most common use of this tense is to emphasize that an event in the past was completed before a more recent event took place.

My parents **had left** for the airport before my plane landed.

This sentence describes two past-time events. The first event is the parents' leaving for the airport, and the second event is the plane landing. The use of the past perfect tense makes it clear that the first event was completed before the second one occurred. Note that the events can also be stated in reverse order.

Before my plane landed, my parents **had left** for the airport.

FUTURE PERFECT TENSE

The future perfect tense consists of will have followed by the past participle of the main verb. This tense, which is rarely used, describes a future action or event that must be completed BEFORE a second future action, event, or time. The following sentence uses the future perfect tense to describe an event completed before a second event.

The game **will have started** before we get to the stadium.

Note that the two events can also be stated in reverse order.

Before we get to the stadium, the game will have started.

The following sentence uses the future perfect tense to describe an action completed before a specific time in the future.

They will have finished by noon.

The Three Progressive Tenses

The progressive tenses consist of a form of the helping verb *be* followed by the present participle of the main verb. The present progressive uses the present tense of *be*, the past progressive uses the past tense of *be*, and the future progressive uses the future tense of *be*.

The progressive tenses are used to describe an action in progress (hence the name **progressive**) at some present, past, or future time.

PRESENT PROGRESSIVE TENSE

The present progressive tense consists of *am*, *are*, or *is* followed by the present participle of the main verb. This tense can describe an action at the precise moment that the sentence is spoken.

Turn the TV down! I am talking on the phone.

The present progressive tense can also refer to a span of time that includes the present.

Global warming is causing climate change.

In addition, the tense is often used to describe future plans or events.

We **are going** to Paris this June.

Hurry, the taxi is coming in 10 minutes.

PAST PROGRESSIVE TENSE

The past progressive tense consists of *was* or *were* followed by the present participle of the main verb. This tense refers to an action that took place at or during some time in the past, whether it occurred at a specific moment or during a span of time in the past.

I was working at my desk by 9 o'clock.

During the game, he was talking on his cell phone.

The time in the past can be defined by another event.

We were working in the garden when we heard the news.

The past progressive tense can also be used in an adverbial clause.

We heard the news while we were working in the garden.

FUTURE PROGRESSIVE TENSE

The future progressive tense consists of *will be* followed by the present participle of the main verb. This tense describes an activity that will occur at some time in the future, whether it will occur at a specific moment or, more commonly, during a span of time in the future.

Their plane will be landing at 6:35.

During the school year, I will be living on campus.

Often, the future time is defined by a present tense adverbial clause.

We **will be staying** in a motel while they remodel the kitchen.

The Intensive Tenses

The so-called intensive tenses consist of a form of the helping verb *do* followed by the base form of the main verb. The present intensive tense is formed with *do* or *does*, and the past intensive tense is formed with *did*. There is no future intensive tense, nor is the intensive used in the progressive tenses.

The intensive tenses are used in three ways.

(1) They emphasize the fact that the action of the verb is or was actually performed.

She does like going to the opera.

I did arrive on time.

(2) The intensive tenses are used with *not* to form the negative of the simple present and past tenses.

They **do** not **go** to the library anymore.

We **did** not **see** Larry at the mall.

(3) The intensive tenses are used to ask simple yes/no questions.

Does the teacher **color** her hair? **Did** all the children **finish** the assignment?

The Passive Voice

In traditional grammar, verbs have **voice**. Voice is determined by whether the subject is the performer of the action of the verb (**active voice**) or the receiver of the action (**passive voice**). Compare the following sentences.

ACTIVE VOICE The dog **bit** the man.

PASSIVE VOICE The man was bitten by the dog.

In the active voice sentence, the subject (the dog) performs the action of biting. In the passive voice sentence, the subject (the man) does not perform the action of biting; instead, he is the receiver of the action. The *by* phrase is not necessary and is, in fact, usually not used.

The passive voice is easily recognized, because it uses a form of the helping verb *be* immediately followed by the past participle form of the main verb—a combination found only in passive voice sentences.

PRESENT TENSE PASSIVE Our flight is canceled.

PAST TENSE PASSIVE Our flight was canceled.

FUTURE TENSE PASSIVE Our flight will be canceled.

The progressive tenses may be used in the passive voice, although the future progressive tense usually sounds awkward.

PRESENT PROGRESSIVE TENSE PASSIVE

PAST PROGRESSIVE TENSE PASSIVE

Our car is being washed.

Our car was being washed.

Our car was being washed.

The passive voice has two primary uses.

(1) It is used to switch attention from the subject of an active voice sentence to another part of the sentence (usually, but not always, the direct object).

ACTIVE VOICE

PASSIVE VOICE

PASSIVE VOICE

The authors sent the manuscript to Marisa.

The manuscript was sent to Marisa.

Marisa was sent the manuscript.

(2) The passive voice is used when the performer of the verb's action is not known.

This beer was brewed in St. Louis, Missouri.

The car was stolen yesterday afternoon.

GUIDE TO CONJUGATIONS

send | sends · sent · have sent

The letter was sent to the wrong address.

- 1 This is the verb number.
- 2 This is the base form of the verb. If this were a Top 40 Verb, there would be an additional page for Complements, Phrasal Verbs, and Expressions, and both pages would have a Top 40 Verb icon at the bottom.
- 3 These are the principal parts of the verb: present | third-person singular present · past · past perfect (containing the past participle).
- 4 This indicates whether a verb forms its past and past participle regularly. Some verbs, like shine (No. 443), have both regular and irregular forms.
- 5 Five tense paradigms are shown in the table format familiar to most English learners, where row and column represent verb person and number, respectively. These five tenses were chosen because they are the most frequently used.
- 6 Some verbs are never used in the progressive tenses, like belong (No. 58); others are rarely used in these tenses, like prefer (No. 353). For these verbs, the progressive forms are not given. We only show forms that an English learner might be expected to use in ordinary conversation or writing.
- 7 An example sentence is supplied for each tense shown.
- 8 The forms for these five tenses are displayed in single lines with no pronouns. Thus, all nine simple, progressive, and perfect tenses in the active voice are shown (see pages 5–9), plus the most frequently used passive tense.
- 9 Some verbs are never used in the passive voice, like amount (No. 25); no forms are given for these. Other verbs cannot have a personal subject in the passive voice, like achieve (No. 8); only it and they forms are given for these. Some writers, of course, may use these personal passive forms in highly figurative or poetic senses. However, because an English learner might be led to use these forms incorrectly, we do not show them.

Some verbs are only used in the passive voice when they are part of a phrasal verb, like dream (No. 163). Because this is a valid use of the passive, all forms are shown for these verbs.

GUIDE TO COMPLEMENTS AND PHRASAL VERBS

- 1 This meaning of *pour* requires no complement.
- 2 The blank line indicates that this meaning of *pour* requires a complement. Either the single complement OBJECT or the double complement INDIRECT OBJECT + DIRECT OBJECT may be used.
- 3 The object in the example sentence is bold.
- 4 One element in a double complement is italicized to distinguish the two complements. The INDIRECT OBJECT + DIRECT OBJECT construction may have a for PARAPHRASE, as shown below.
- 5 The direct object is bold, and the indirect object is bold italic (corresponding to the italic in the complement name).
- **6** An example sentence in the passive voice uses bold italic to indicate the second element of a double complement.
- 7 This use of *pour* as a phrasal verb requires no complement. Several phrasal verb particles are possible in this construction.
- 8 This use of *pour* as a phrasal verb requires a complement. The SEP on the blank line indicates that the phrasal verb is separable (see page 15).
- 9 This use of *pour* as a phrasal verb requires a complement. The blank line without SEP indicates that the phrasal verb is inseparable (see page 15).

Complement types are not identified in the Phrasal Verbs section, since virtually every complement of a phrasal verb functions as an object of the verb, whether it is an OBJECT, REFLEXIVE PRONOUN, or PRESENT PARTICIPLE. Bold and bold italic are not used in examples sentences in the Phrasal Verbs section.

The Expressions section (not shown here) includes a blank line for a required complement.

	COMPLEMENTS)
1) pour fall/flow steadily [OF A LIQUID]	It has been pouring all night. The milk was pouring down the baby's chin.
pour ② fill a glass/cup with [a liquid], s	serve [a liquid] (3)
OBJECT	Please pour the wine , will you? Don't pour the coffee until the guests arrive.
4 INDIRECT OBJECT + DIRECT OBJECT	We poured <i>the children</i> some lemonade. 5 The hostess poured <i>everyone</i> a glass of wine.
for paraphrase	We poured some lemonade <i>for the children</i> . The hostess poured a glass of wine <i>for everyone</i> .
pour dispense [a liquid]	
OBJECT + ADVERB OF PLACE	I poured the marinade <i>over the meat.</i> He poured the water <i>down the drain.</i> She carefully poured the medicine <i>into the dispenser.</i>
6 PASSIVE	The unused olive oil was poured <i>back into the bottle</i> .
	PHRASAL VERBS
7) pour back/down/forth/in/out/through/ etc. flow in a specified direction	The levee collapsed, and the floodwater poured in.
8 pour <u>SEP</u> away/back/in/out/etc. cause to flow in a specified direction	Pour the milk back into the jug.
9 pour into / out of enter/exit in large numbers	Fans poured into the stadium.
<pre>pour [oneself] into become very involved in</pre>	After being laid off, he poured himself into finding a new job.
pour <u>SEP</u> out discard [a liquid]	The milk is past its expiration date; we need to pour it out.

VERB COMPLEMENTS

We use the term **complement** as a collective word for all the different grammatical structures required by verbs to make a grammatical sentence. Complement is much broader than the term **transitive**. In traditional grammar, a transitive verb must be followed by a direct or indirect object. The term complement, however, includes not only objects, but predicate adjectives, predicate nouns, several types of infinitives and clauses, and several types of adverbs. A verb may require one complement or more than one complement to make a grammatical sentence. Many intransitive verbs require no complement at all, for example, the intransitive verb *cried* in *John cried*.

The verb *put* with the sense "place, set" takes the double complement OBJECT + ADVERB OF PLACE, illustrated by the following sentence.

I put my keys on the dresser.

If either complement is deleted, the sentence is ungrammatical.

X I put on the dresser. X I put my keys.

When you use the verb put to mean "place, set," you must put something (an object) SOMEWHERE (an adverb of place).

Most English verbs may be used with more than one type of complement. The choice of complement type is determined by the particular meaning of a verb. If the meaning of the verb changes, the complement type(s) may change too, and vice versa: If the complement type changes, the verb's meaning often changes.

To illustrate the interconnection between verb meaning and complement type, consider the complements for the verb *argue*.

argue disagree, quarrel They argue all the time. argue ____ debate OBJECT The justices argued the issue. argue _____ assert, try to prove by giving reasons Vince argued his case before the judge. OBJECT Vince argued that he was innocent. THAT-CLAUSE

There are as many entries for a verb as there are distinct meanings, three in the case of argue. Each entry has its own group of complements that can be used with that particular meaning, including the possibility of no complement, as in the first entry for argue.

If a verb is followed by a blank line (_____), the verb with that particular meaning requires an actual complement to make the sentence grammatical. The types of complements that the meaning requires are given in small capital letters as subentries. For example, the third meaning of argue (assert, try to prove by giving reasons) can take either of two different complements: an OBJECT or a THAT-CLAUSE (a noun clause beginning with that). To the right of the complement type are one or more sentences illustrating use of the complement. The words of the sentence that correspond to the complement are in bold. Using the third entry for argue, his case is an example of an OBJECT complement and that he was innocent is an example of a THAT-CLAUSE complement. (See "Guide to Complements and Phrasal Verbs" on the previous page.)

If a verb is NOT followed by a blank line, it is **intransitive**, that is, it does not require an actual complement to make the sentence grammatical. In this book, the intransitive meanings of a verb are listed before the meanings that require actual complements. In the example of argue, the fact that the first meaning (disagree, quarrel) is not followed by a blank line means that the verb with this particular meaning is intransitive. In the example sentence They argue all the time, the adverbial expression all the time is not obligatory; the sentence would still be grammatical if we deleted it.

They argue.

Most of the complement types in this book will be familiar to you, but some may require further explanation. Following is a list of special terms that you will encounter in the description of complements.

THAT-CLAUSE This is a noun clause beginning with that.

I thought that dinner was good, but a little too heavy.

BASE-FORM THAT-CLAUSE The verb in the THAT-CLAUSE is in its uninflected base form and does not need to agree with the subject. For example, *be* in the following THAT-CLAUSE does not agree with its subject *defendant*.

The court ordered that the defendant be kept in jail.

PRESENT PARTICIPLE This term includes both present participles and gerunds (present participles modified by a possessive noun or pronoun).

I hated **leaving so early**. (PRESENT PARTICIPLE) I hated **John's leaving so early**. (GERUND)

WH-CLAUSE This is a noun clause beginning with a *wh*-word (*who, whom, whose, what, which, when, where, why,* and *how* (which does not actually begin with *wh*)), as well as compounds of these words (*whoever, whomever, whatever,* etc.).

Did you hear who won the game? We will grow what sells the best. They will hire whoever is the most qualified.

WH-INFINITIVE This is a noun clause beginning with a *wh*-word followed by an infinitive.

Raymond asked him **what to do next**. I told them **where to go**.

Complement Types

This book uses 18 basic, or single-element, complement types, which appear in bold in the example sentences. Many of these basic complement types can be combined and used together. If two complements are used, one complement (usually the first) is in bold and the other in bold italic.

Single Grammatical Element Complements

ADVERB OF TIME The presentation will last **fifty minutes**.

ADVERB OF PLACE He always stays **in town** during the week.

ADVERB OF PLACE TO/FROM The refugees fled **into the woods**.

ADVERB OF MANNER The children behaved **badly**.

OBJECT I hurt my elbow.

for/in/of/to/etc. OBJECT Haste always results in confusion.

The bill amounted to \$137.50.

REFLEXIVE PRONOUN I flung myself into jazz.

PREDICATE NOUN Her father was a famous artist.

PREDICATE ADJECTIVE The moon was **bright**.

INFINITIVE We would like to meet your friends.

THAT-CLAUSE We soon discovered **that we had made a mistake**.

BASE-FORM THAT-CLAUSE The doctor recommended **that Mr. Smith be kept**

overnight for observation.

WH-CLAUSE We will soon know who will get the job.

We will soon know where the new office will be.

WH-INFINITIVE The teacher explained where to get the information.

The teacher explained how to do it.

IF-CLAUSE He asked **if we were ready**.

PRESENT PARTICIPLE I hate (our) leaving in the middle of a meeting.

PAST PARTICIPLE We felt overwhelmed by the experience.

DIRECT QUOTATION "Good morning," she said. "We're glad you're here."

Multiple Grammatical Element Complements

Fifteen multiple element complements are commonly used.

OBJECT + ADVERB OF PLACE We left **the children** *at home*.

OBJECT + ADVERB OF PLACE TO/FROM He drove **us** *to the station*.

A policeman directed the traffic onto a side street.

INDIRECT OBJECT + DIRECT OBJECT The driver gave *us* directions.

He did *us* a big favor.

to PARAPHRASE The driver gave **directions** *to us*. for PARAPHRASE He did **a big favor** *for us*.

OBJECT + PREDICATE NOUN They called **the idea** *a stroke of genius*.

OBJECT + PREDICATE ADJECTIVE They called **the idea** *silly*.

OBJECT + INFINITIVE They invited us to stay for dinner.

OBJECT + BASE-FORM INFINITIVE We helped them answer the phones.

OBJECT + THAT-CLAUSE He persuaded **the jury that his client was innocent**.

OBJECT + BASE-FORM THAT-CLAUSE He urged **John that he reconsider his decision**.

OBJECT + WH-CLAUSE I told **my friends** what they should expect.

OBJECT + WH-INFINITIVE I told my friends what to expect.

OBJECT + PRESENT PARTICIPLE I hate **him** *complaining about everything*.

OBJECT + PAST PARTICIPLE We need the filter *changed in our furnace*.

Other combinations may be used by certain verbs. Note that OBJECT is divided into INDIRECT OBJECT and DIRECT OBJECT complements for certain verbs, like *give* and *do* above.

PHRASAL VERBS

make tidy

A **phrasal verb** is a verb + particle combination that has a meaning different from the combined meanings of the verb and particle (an adverb or preposition). For example, the verb *pick* means "choose, select" or "pluck, remove; gather, harvest." When combined with *up*, it can have at least a dozen different meanings. Four of the meanings for *pick up* are given here with example sentences.

increase, improve
stop for and take along
learn easily

Business has **picked up** since Christmas.
Would you **pick** us **up** at seven?
I **picked up** Italian over the summer.

You must **pick up** your room before going out to play.

None of the ordinary meanings of *pick* and *up* indicate that these words used together would have the meanings above. That is why we call phrasal verbs **idiomatic**.

English abounds with phrasal verbs. In fact, there are many more phrasal verbs in English than nonphrasal verbs. Because they are idiomatic, phrasal verbs can be difficult for English learners.

Not all verb + particle combinations are phrasal verbs. In some cases, the particle is used as a preposition that doesn't change the basic meaning of the verb. *Arrange for* is an example.

```
arrange _____ plan, cause something to happen

(for) OBJECT They will arrange (for) a celebration.

for OBJECT + INFINITIVE He arranged for John to visit them in Chicago.
```

In the first sentence above, *for* is optional. In the second sentence, *for* is obligatory, but it doesn't change the meaning of *arrange*. For this reason, *arrange for* is not considered a phrasal verb, and it is included in the Complements section instead.

Some verbs must always be used with a particular preposition; for example, *amount* is always used with *to*.

```
amount ____ add up

to OBJECT The bill amounted to $137.50.

to WH-CLAUSE It amounted to however much you could afford.
```

Since *amount* must always be used with *to, amount to* is included in the Complements section.

Separable and Inseparable Phrasal Verbs

Many phrasal verbs take no object.

```
settle down establish a home Our son eventually settled down in south St. Louis. swim off swim in the opposite direction After we fed the dolphins, they swam off.
```

For these phrasal verbs, the particle must be placed immediately after the verb.

Most phrasal verbs, however, take an object. For some of these, the particle can be placed after the object—away from the verb—and for others, the particle must be placed after the verb. There are no simple rules for determining whether the particle is placed after the verb or after the object.

Generally, if the particle is considered a preposition, it must be placed after the verb; this type of phrasal verb is called **inseparable**. However, if the particle is considered an adverb, it can, and sometimes Must, be placed after the object; this type of phrasal verb is called **separable**. Most phrasal verbs are separable.

```
INSEPARABLE PHRASAL VERB My brother depended on his car. ("rely on")
SEPARABLE PHRASAL VERB My brother turned on his car. ("switch on")
```

In the first example, *on* is considered a preposition, and therefore it cannot be placed after the object *his car*.

```
X My brother depended his car on.
```

In the second example, *on* is considered an adverb, and therefore it can be placed after the object *his car*.

```
My brother turned his car on.
```

For separable phrasal verbs, the particle can be placed after the verb or after the object. There is an important exception, however: If the object is a pronoun, the particle MUST be placed after the object.

```
My brother turned it on. X My brother turned on it.
```

You can test whether a phrasal verb is separable or inseparable by using a pronoun as its object: If the particle MUST be placed after the pronoun object, the phrasal verb is separable; otherwise, it is inseparable.

Note that if the object of a separable phrasal verb is a long noun phrase, it is better to place the particle after the verb.

Don't **throw** away the lamp that I spent four hours fixing. ? Don't **throw** the lamp that I spent four hours fixing away.

You can often determine whether a phrasal verb is separable by knowing whether the particle is considered an adverb or a preposition. In the preceding examples, *on* is used both as a preposition (*depend on*) and as an adverb (*turn on*). However, some particles are almost always used as prepositions; these generally form inseparable phrasal verbs.

```
across into
after of
against to
at upon
between with
```

The club **leaped at** Kyle's offer.

X The club leaped Kyle's offer at.

Acid was **eating into** the countertop.

X Acid was **eating** the countertop **into**.

Some particles are almost always used as adverbs; these particles generally form separable phrasal verbs.

```
ahead forth
aside in
away off
back out
down up
```

She **poured off** a little sauce before cooking.

She **poured** a little sauce **off** before cooking.

She **poured** it **off**.

A young attorney **drew up** my will.

A young attorney **drew** my will **up**.

A young attorney **drew** it **up**.

Other particles are separable with some verbs and inseparable with others.

```
about on
along over
around through
behind under
by
```

See the examples with *depend on* and *turn on* on the previous page.

To indicate a separable phrasal verb, a blank line with SEP is used for the complement (object).

```
figure __SEP_ out solve, determine

Tim figured the crossword puzzle out in six minutes.

Tim figured out the crossword puzzle in six minutes.

Tim figured it out in six minutes.
```

An inseparable phrasal verb is indicated by a blank line (without SEP) after the particle.

```
figure on _____ plan/count/depend on Let's figure on going to a movie after dinner.
```

A phrasal verb may have more than one particle. If there are two or more particles, the last particle is almost always a preposition with its own object.

beat _____ back to return to [a place] My sister beat her friend back to the station. sooner than

For phrasal verbs like this, the object is placed between the verb and its particle(s). In the sentence above, the object of the verb (her friend) is placed between beat and back, and the object of the preposition (the station) is placed after the preposition.

The Most Common Phrasal Particles

Following is a list, with examples, of the particles most commonly used in phrasal verbs.

across	
come across find by accident	She came across her high school yearbook.
after keep after nag, harass	Mom keeps after us about our homework.
along pass <u>SEP</u> along transfer [a price change]	The store passed along the price increase to its customers.
around avoid	He got around the problem by installing new software.
aside lay <u>SEP</u> aside save	She laid aside \$100 a month for her son's college education.
at leap at accept eagerly	The class leaped at Hilary's offer to bake a cake.
away pack <u>SEP</u> away store	Gene and Jan packed the baby clothes away .
back cut SEP back shorten	We must cut the shrubs back after they flower.
behind fall behind (on) lag behind	They were falling behind on the rent.
between cause trouble between	We can't let a silly quarrel come between us.
down knock <u>SEP</u> down demolish	Workers knocked the vacant building down .

out hand <u>SEP</u> out distribute	She handed out the schedule to reporters.
out of	
change out of replace [one set of clothing with another]	I'm all sweaty—I have to change out of these running clothes.
over	
make <u>SEP</u> over change the appearance of	The programmer made over his cubicle with movie posters.
through	
carry <u>SEP</u> through accomplish	She is determined to carry through her vision of a drug-free America.
to	
look to depend on	Students look to their teachers for help.
under	
fall under be influenced/ controlled by	The princess fell under the power of the wicked queen.
up	
mark <u>SEP</u> up raise the price of	The art dealer marks paintings up 200%.
up on	
catch up on bring up-to-date about	The assistant will catch the actor up on the news.
upon	
hit upon discover	She hit upon the idea of extending Medicare to people 55 and over.
with	
live with endure, put up with	He lived with a limp for the rest of his life.

Note the double particles *in on, out of,* and *up on* in the list above.

Verbs of Motion

Verbs of motion typically form many phrasal verbs with particles considered to be adverbs. This is listed as the first entry in the Phrasal Verbs section.

<pre>pull away/back/down/in/out/over/up/etc.</pre>	The van pulled away slowly.
move in a specified direction	We're lost. Let's pull over and look at
	a map.
pull _SEP_ along/aside/away/over/under/	Can you pull the kids away from the TV?
up/etc. cause to move in a specified direction	Sam pulled up a chair and sat down.

EXPRESSIONS

An Expressions section is included on verb pages where space permits. The entries are common idiomatic set phrases that are useful to the English learner.

I was lying we were lying you were lying he/she/it was lying we were lying they were lying

• The book was lying on your desk.

FUTURE ... will lie
FUTURE PROGRESSIVE ... will be lying
FUTURE PERFECT ... will have lain

PAST PASSIVE

Lie is never used in the passive voice.

NOTE: The irregular verb *lie* is presented here. The regular verb *lie* (*lie* | *lies* · *lied* · *have lied*) means "to say something that isn't true"; it may be used without an object (*The suspect is lying*) or with a THAT-CLAUSE (*She lied that her husband was home all evening*).

COMPLEMENTS

NOTE: The verbs *lie* and *lay* are often confused, in part because the past tense form of *lie* (*lay*) is the same as the present tense form of *lay*. (See verb No. 282.)

INFINITIVE PRESENT PAST PAST PARTICIPLE BASIC MEANING

lie lie lay have lain "be in a horizontal position" lay laid have laid "put in a horizontal position"

The two verbs are historically related in an odd way: *To lay* means "to cause something *to lie*." In other words, *lay* always requires a direct object, while *lie* is never used with a direct object.

lie be buried Here lie the bones of the city's founder.

lie _____ be located

ADVERB OF PLACE The report is lying **right in front of you**.

The town lies in the Thames valley. His few hairs lay across his bald head.

more energetic politician.

Irregular Verb Form Index

This index includes all irregular forms of the 152 irregular verbs in this book: the irregular past forms, as well as the irregular third-person singular present forms used by a few verbs. The past forms of some regular verbs have irregular spellings, and these forms are also included.

A form followed by an asterisk (*) is a past form that is spelled like the base form of the verb; except for *read*, the past form is also pronounced like the base form.

The Big Book of English Verbs Exercise and Self-Assessment CD-ROM

is a unique program that will help you improve your English verb skills.

INSTALLATION INSTRUCTIONS

This product should be installed on your computer so the CD-ROM need not be present in your drive to work. It is designed to run on a single standalone computer.

PC.

To start: Insert the CD-ROM into your CD-ROM drive. The CD-ROM installation should launch automatically once it is inserted. If the installation does not launch automatically, do the following: Double-click MY COMPUTER. Find and open your CD-ROM disk drive. Double-click on SETUP or SETUP.EXE.

The installer will copy all necessary files to your hard drive, as well as create a Program Group with access to the main application. No system modifications are made other than the file copy and program group processes described above.

Once the program files are installed, click on the Big Book icon on your desktop or use the START menu and select Programs/McGraw Hill/English Verbs.

Apple Macintosh

To start: Insert the CD-ROM into your CD-ROM drive. A window will open, showing the contents of the CD. Drag the program icon to your Applications folder. For easy access, create an alias of the program on your desktop or on your dock.

SYSTEM REQUIREMENTS

PC

Microsoft Windows 2000, XP, Vista
Intel Pentium III processor (450 MHz recommended) or better
256 MB RAM
Display capable of 800 × 600 resolution and 16-bit color
Windows-compatible sound card

Apple Macintosh

Mac® OS X 10.3.9, 10.4.x, 10.5.x Power PC processor (G3 or higher recommended), any Intel Processor 256 MB RAM

This CD-ROM is intended for use by a single student on a standalone computer.

TROUBLESHOOTING

If you have any difficulties with this product, please go to the McGraw-Hill Technical Support website at http://mhp.softwareassist.com.

Note to users who receive the error message "The error ELNTFCASTEROOR in module. Interface not supported"

Issue: This error message is displayed when attempting to execute a Zinc Projector. This occurs because Zinc Projectors require the Microsoft MDAC drivers to be present on the user's system to function correctly. The MDAC Drivers are used by the Projector to evoke Database Connectivity. (They are still required even if your Projector does not use Database functionality.)

Solution: The MDAC drivers are installed by default across 99.9% of systems from Win98SE upward. In very rare cases, however, some OEM licenses do not include them. In this case, they can be downloaded and installed, completely free, from the Microsoft website.

Note to Windows 2000 users

If you receive an installation error, please update your Windows Installer. To update the Windows Installer, please go to http://www.microsoft.com/downloads/details.aspx?display lang=en&FamilyID=4B6140F9-2D36-4977-8FA1-6F8A0F5DCA8F.
